The Dfuse Approach

Dfuse Technologies is a value-added reseller with a focus on cyber security solutions and data management/analytics solutions to public and private sector clients on a local, regional and national level. We have relationships with multiple industry-leading vendors in each area of expertise enabling us to provide an objective approach to designing and implementing your Cyber Security Solutions and Data Management Solutions. Dfuse empowers IT choices through the implementation and management of hardware, software and technical services. Our Solutions include backup/recovery/archive, big data, cloud computing, data storage design, cyber security, RMF and A&A, application, integration, consolidation and migration.

Technology Products & Services Offered

Duo Security: For organizations of all sizes that need to protect sensitive data at scale, Duo’s trusted access solution is a user-centric zero-trust security platform for all users, all devices and all applications.

mongoDB: A general purpose, document-based, distributed database built for modern application developers and for the cloud era.

Alteryx: A leader in the self-service data analytics movement with a platform that can discover, prep, and analyze all your data, then deploy and share analytics at scale for deeper insights faster than you every thought possible.

proofpoint: Provides the most effective cybersecurity and compliance solutions to protect people on every channel including email, the web, the cloud, and social media.

Cofense: Provides comprehensive phishing defense services to protect your data, reputation and business.

Oracle Gold Partner: Delivering innovative and leading-edge Oracle applications, enterprise software products, and supporting Oracle in the market.

Amazon Web Services: Whether you’re looking for compute power, dataset storage, content delivery, or other functionality, AWS has the services to help you build sophisticated applications with increased flexibility, scalability, and reliability.

memSQL: The world’s fastest, most capable cloud database for operational analytics, machine learning & AI.

Action: A pioneer of cutting-edge big data platforms and tools.

Microstrategy: A provider of business intelligence (BI), mobile software and cloud-based services.
