### UNDERSTANDING THE MISSION AND ACCEPTING THE CHALLENGE

Dfuse understands that each client presents a different set of challenges - resources, schedules, environments, infrastructure. Dfuse developed a business structure with no boundaries; we work as one collective data source. When you engage Dfuse, you hire a company of experts, not an individual. We create an environment of empowering synergy and collective thinking. Our approach has resulted in repeat business from numerous satisfied clients.

## EXPERTS IN THE BIG MIDDLE

Our seasoned technology professionals know what it takes to cover the middle ground and deliver substantial business improvements and serious ROI. From initial analysis to development, integration, and training - Dfuse understands that the buzz around "end-to-end" solutions includes a pretty big middle, too. Before you begin the journey from one "end" to the other, we help our clients plan for data storage, data security, reporting, and visibility to improve operations and maximize efficiency across your business.

### HONORS

Business Hall of Fame 9 Consecutive Years - Proud Winners of "BEST OF ASHBURN, VA" SECAF Finalist - Under \$6M category, 2014  
Inducted in **INC. 5000** as one of the Fastest-Growing U.S. Companies in 2014 and 2015  
Northrop Grumman's Top Supplier and Socio Economic Award, 2010  
Loudoun County Economic Development Awardee

### PAST PERFORMANCE HIGHLIGHTS:

#### US ARMY HRC iPERMS

iPERMS is the system of record and storage for the Official Military Personnel File (OMPF) during the Soldier's active service and is the Records Management Application (RMA) for the future system IPPS-A. Dfuse engineers and developers provide instrumental support in various areas

of program and system development including: requirements gathering and analysis, development of software capabilities using Oracle and Java platforms, user interface design, database architecture, website development and maintenance, documentation, training and RMF support.

#### DHA AFHSB DMTS

Dfuse provides Data Management and Technical Support (DMTS) Services for the technical infrastructure required to conduct comprehensive surveillance and analysis of health-related information. In support of the AFHSB mission, Dfuse provides enhanced database infrastructure

and architecture services. Our Java and .NET engineers designed and executed a strategy to migrate the total AFHSB environment over to a .NET-based environment, providing instrumental support in developing application code to help them seamlessly move to .NET.

#### US Army ACAP Software Development and Integration Services

In support of the Army Career Alumni Program (ACAP), Dfuse provided tactical and strategic program support to Serco and the end client, the U.S. Army. The scope of requirements included software design and

development, and COTS integration and deployment. We are providing software development support using .NET and Java technologies including middleware technologies like websphere and IIS. We are also providing support on all aspects of database design and deployment on Oracle platform.

#### Mobile Development and Bluetooth Low Energy

Dfuse is working with a commercial customer to develop a mobile application using **Bluetooth Low Energy**

4.0 (BLE4) technology for proximity based notification services for Android and iOS devices. We are currently designing, developing and prototyping the desired application functionality.

### WHAT SETS US APART:
